

A pair of blue rubber boots is shown splashing in water. The boots are positioned in the center, with water splashing around them. The text "We're making a BIG Splash!" is overlaid on the image in a white, bold, sans-serif font. The word "Splash!" is significantly larger than the rest of the text.

We're making a **BIG**
Splash!

The world's **lightest**, most comfortable performance wellington boot, featuring AIR-TUNNEL 360° technology and AIR-LINER fabric for maximum comfort and warmth.

Probably the world's lightest, most comfortable wellington boot, with an innovative air circulation system. SUPERLITE® boots are naturally lightweight, buoyant, durable and at the cutting edge of comfort. Using an injected M.I.SHELL™ the boot is self-insulating and waterproof, allowing it to act as a natural medium between the foot and the elements. In addition the AIR-TUNNEL 360°™ technology provides the boot with small air tunnels, allowing air circulation around the foot. This teamed with the 3 dimensional AIR-LINER™ fabric means the SUPERLITE® boot draws moisture from the foot resulting in the utmost comfort and warmth for the wearer.

AIR-TUNNEL 360°
circulates air, cooling comfort

M.I.-SHELL™
weather-proof, insulating, one piece shell

AIR-LINER
soft air transfer lining, cooling comfort

TRAIL-GRIP
rugged, durable, dual density rubber sole

Insulated wellingtons for all types of outdoor activity from walking the dog to trekking through the rough.

These insulated wellingtons are perfect for all outdoor wear. All Grub's footwear uses a unique self-insulating INSU-FOAM ULTRA bootie construction, and high-grade, consistent quality Chloroprene, making it both more waterproof and more stretching than other brands. With ranges featuring from 5mm to 8.5mm thick Chloroprene, Grub's keep feet comfortable in all temperatures from -40° to +30°C and the removable 6mm foot-bed provides unrivalled insulation and cushioning. The out-sole, manufactured by Vibram®, the world's finest producer also provides excellent comfort and stability, even on challenging terrain, making these boots suitable for a wide range of activities. Where the going gets tough, some styles feature a hardened toe and extra layers of rubber.

Technical innovation combines with fun design giving warm feet and smiling faces for kids.

Muddies mean warm feet and smiling faces for kids everywhere. A range of three boots, these innovative wellies offer high quality Chloroprene foam booties with a Nitrocel footbed and quick-clean rubber overlays. With terry toweling lining in the Puddle and Luge styles, and a fleece lining in the Icicle, the range is suitable for temperatures down to -10°C . Kick rims offer hands-free removal for kids and parents alike!
